

Builders from the next city over have come to help get you started!

SETUP

Before placing a starting card into your build area, place the Points of Interest card, with either side face up. Then place the starting card, covering one half of the Points of Interest Card, either horizontally or vertically.

END OF THE GAME

Score 1 point for each matching block adjacent to the Point of Interest.

This would score 4 extra points.

The diagonal park does not score. Only the orthogonally adjacent blocks will score.
