

STELLAR OBJECTIVES REFERENCE SHEET

Scorable element
and / or feature

Majority bonus

Objective points

Description of the objective on this illustration:

2 points for each comet in your asteroid belt.

3 additional points if you are the one who has the most comet points.

A stellar objective only provides points to its possessor based on the configuration of his personal board.

Majority bonus: Only the person who owns the objective scores and can receive 3 additional points if he is the player who totals the most for that objective. If there is a tie, the player does not receive the bonus.

Gas planets of any colour.

Only the planets count towards the objective score.

Only the moons count towards the objective score.

Both the planets and the moons count towards the objective score.

1 point for each gas planet (with or without rings) or terrestrial planet (with or without water and atmosphere).

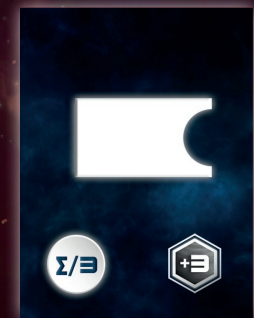

2 points for each gas planet (with or without rings).

1 point for each terrestrial planet or moon with life (with or without water and atmosphere).

2 points for each terrestrial planet (with or without water and atmosphere).

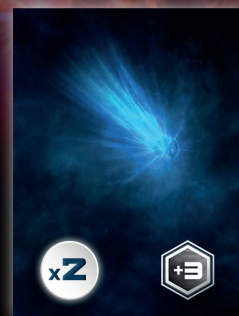

Add the value of your completed planetary objectives and divide the total by 3 (rounding the total down).

2 points for each exotic object (with or without counters).

2 points for each terrestrial planet or moon with water and atmosphere.

2 points for each comet in your asteroid belt.

2 points for each gas planet of a different colour (with or without rings).

2 points for each gas planet with rings.

STELLAR OBJECTIVES REFERENCE SHEET

1 point for each terrestrial moon of size 2 or bigger (with or without water and atmosphere).

2 points for each planet in your longest sequence of consecutive terrestrial planets (with or without water and atmosphere).

2 points per planet in your longest alternating sequence of gas planets (with or without rings) and terrestrial planets (with or without water and atmosphere).

2 points for each celestial body - planet and moons - located in your 5th orbit.

2 points for each planet in your longest sequence of consecutive gas planets (with or without rings).

2 points for each terrestrial planet or moon of size 4 (with or without water and atmosphere) and for each gas planet of size 2 (with or without rings).

3 points for each pair of gas giants (with or without rings) and terrestrial body with water and atmosphere, be they planets or moons.

1 point for each asteroid captured as a moon (do not count those in your asteroid belt).

1 point for each type of celestial body: terrestrial, gas, exotic, comet and asteroid (the latter must be in your asteroid belt).

1 additional point if at least one of your terrestrial planets or moons has water and atmosphere, and an

additional point if at least one of your gas planets has rings.

1 point for each different colour in your system.

(This objective is awarded to a maximum of 12 points and lacks the majority bonus)
